

Jagathees Kandhasamy

Dharapuram, Tiruppur • [\(91\) 9500872831](tel:919500872831) • jagatheeskandhasamy@gmail.com • [Linkedin](#) • [Github](#)

Motivated Full Stack Developer with a solid foundation in front-end and back-end technologies including React.js, Node.js, Python, and SQL/NoSQL databases. Experienced in building scalable, responsive web applications through personal projects. Proficient with modern development tools such as Git and Postman for efficient and streamlined workflows. Known for strong problem-solving abilities, a commitment to continuous learning, and a focus on writing clean, maintainable code while delivering intuitive and user-friendly experiences.

Skills

Programming: C, Python, Java

Web Development: HTML, CSS, JavaScript/Typescript, React.js, Next.js, REST APIs

Backend: Python, Node.js, Express.js

Tools & Platforms: Git, Postman, Linux

Databases: MySQL, PostgreSQL, MongoDB

Experience

Software Developer Intern | Avasoft

Gained hands-on experience in PostgreSQL, performing database design, writing optimized queries, and managing data efficiently. Used Postman for API testing, ensuring 100% functional compliance with expected request/response handling. Created UML diagrams (Use Case, Class, Sequence) to document system architecture, improving development clarity and reducing onboarding time by 20%.

Education

Bachelor of Engineering in Mechatronics Engineering (2020 – 2024)

Dr. Mahalingham College of Engineering and Technology

CGPA: 8.1

HSC (2018 - 2020)

Vivekananda Matric Higher Secondary School

Percentage: 83%

SSLC (2016 - 2018)

Shree Kamadhenu Matric School

Percentage: 93%

Certifications

Complete Web Development Bootcamp – 2024 (Udemy)

Data Science & Machine Learning Bootcamp - 2022 (Udemy)

Git for Beginners (Udemy)

Introduction to Cybersecurity Tools and Cyber Attacks (Coursera)

Projects

Game Discovery App Developed a React-based web application that allows users to explore and discover video games using the RAWG API. Implemented TypeScript for enhanced type safety and better code maintainability. Designed a responsive UI using React hooks, custom hooks, and modern styling techniques. Optimized API calls and state management for improved performance and seamless user experience.

Food Delivery App Built a responsive food delivery web app using React with features like dynamic menu browsing, cart management, and order placement. Used React Context API for efficient global state management of cart and user data, ensuring a seamless user experience. Implemented React Router (BrowserRouter) for seamless navigation across pages like Home, Menu, Cart, and Checkout. Focused on clean UI/UX, modular components, and streamlined data flow to deliver an intuitive online ordering experience.

GEARBOX FAULT DIAGNOSIS USING MACHINE LEARNING Designed a machine learning-based solution for early detection of gearbox faults to improve predictive maintenance and reduce unexpected downtime. The project involved preprocessing sensor and vibration data, extracting relevant statistical and frequency-domain features, and training multiple classification models including K-Nearest Neighbors (KNN), Logistic Regression, and Random Forest using Python and Scikit-learn. Each model was evaluated using cross-validation and performance metrics such as accuracy, precision, and recall.
